Our Fall Gemstone Collection dazzles with rich colors! Read below for texture and shade descriptions.

- Lapis, Jasper, Jade, Agate and Rubellite are JUICY and light in texture, yet opaque in 2-coats.
- Moonstone has a creamy texture with a slight shimmer.
- Amethyst, Druzy and Obsidian are a Crelly formula, with foil flakes that add a spark of color. These are opaque in 2-3 coats.
- Opal is our topper! Transform any shade with a light POP of iridescent spark.
